

## *Code Samples*

---

Code Example 2-1	A Simple Threads Program . . . . .	16
Code Example 2-2	Thread-Specific Data—Global but Private . . . . .	22
Code Example 2-3	Turning Global References Into Private References . . . . .	23
Code Example 2-4	Initializing the Thread-Specific Data . . . . .	24
Code Example 3-1	Creating a Detached Thread . . . . .	48
Code Example 3-2	Creating a Prioritized Thread . . . . .	59
Code Example 4-1	Mutex Lock Example . . . . .	82
Code Example 4-2	Deadlock. . . . .	83
Code Example 4-3	Conditional Locking. . . . .	84
Code Example 4-4	Singly Linked List Structure . . . . .	84
Code Example 4-5	Singly-Linked List with Nested Locking. . . . .	85
Code Example 4-6	Circular Linked List Structure. . . . .	86
Code Example 4-7	Circular Linked List With Nested Locking. . . . .	86
Code Example 4-8	Using <code>pthread_cond_wait()</code> and <code>pthread_cond_signal()</code> . . . . .	97
Code Example 4-9	Timed Condition Wait . . . . .	99
Code Example 4-10	Condition Variable Broadcast . . . . .	100

---

Code Example 4-11	The Producer/Consumer Problem and Condition Variables . . . . .	103
Code Example 4-12	The Producer/Consumer Problem – the Producer . .	104
Code Example 4-13	The Producer/Consumer Problem – the Consumer .	105
Code Example 4-14	The Producer/Consumer Problem With Semaphores	114
Code Example 4-15	The Producer/Consumer Problem – the Producer . .	115
Code Example 4-16	The Producer/Consumer Problem – the Consumer .	115
Code Example 4-17	Synchronization Across Process Boundaries . . . . .	116
Code Example 5-1	Continuation Semantics . . . . .	134
Code Example 5-2	Asynchronous Signals and sigwait(2) . . . . .	138
Code Example 5-3	Completion Semantics . . . . .	139
Code Example 5-4	Condition Variables and Interrupted Waits . . . . .	143
Code Example 6-1	Degrees of Thread Safety . . . . .	150
Code Example 9-1	Read/Write Bank Account . . . . .	199
Code Example 9-2	The Producer/Consumer Problem, Using USYNC_PROCESS . . . . .	222
Code Example 10-1	Global Variables and errno . . . . .	226
Code Example 10-2	The gethostbyname() Problem . . . . .	227
Code Example 10-3	The printf() Problem . . . . .	228
Code Example 10-4	Testing the Invariant With assert(3X) . . . . .	231
Code Example 10-5	The Producer/Consumer Problem—Shared Memory Multiprocessors . . . . .	241
Code Example 10-6	Mutual Exclusion for Two Threads? . . . . .	243
Code Example 10-7	Multithreaded Cooperation (Barrier Synchronization)	244
Code Example A-1	Solaris Threads Example: barrier.c . . . . .	249
